Replacement Mailboxes
Horizontal and Vertical Units

Florence has been designing and manufacturing mailboxes for centralized delivery since 1934 and is proud to continue building its horizontal and vertical mailboxes for your postal replacement and private delivery applications.

Postal Delivery is when the USPS Letter Carrier delivers mail to each existing tenant compartment in a mailbox installation, while private delivery is when the letter carrier simply drops all the mail at one location and another entrusted individual places it into all the individual tenant compartments - most commonly used in university and military housing settings.

Mailboxes for private delivery do not have to conform to current postal regulations and therefore often vary in size and installation requirements from standard USPS Approved equipment.

Due to changes in postal regulations, these older style horizontal and vertical mailboxes may now only be used to replace a current installation of similar mailboxes when no modification of the existing wall opening will be made. However, if the rough opening dimensions will be changed during a replacement or remodel, or the install is for new construction, STD-4C equipment will be required *(see pages 12 - 29 for product details)*.

Vertical mailboxes come in five standard sizes and easily slip into the opening vacated by an older box; however, it is highly recommended that existing vertical mailboxes be upgraded to either a CBU or STD-4C to ensure proper security. As mail is loaded from the top of these vertical units, it makes them vulnerable to the weather so they should be used indoors only.

Horizontal mailboxes are an economical solution for your private centralized mail delivery needs when a large number of mailboxes are needed within a limited amount of indoor wall space. As these mailboxes were designed to meet specifications which are 30+ years old, they should be protected from the weather and only installed indoors as they do not include the same weather resistant features or security features as the STD-4C mail equipment of today.

To quickly and easily design your horizontal mailbox installation, Florence has developed an easy-to-use Revit mailbox configurator which is unique to the industry. This do-it-yourself online tool offers both a wizard mode featuring all standard modules for novices, and an advanced power mode for those that want to upgrade their installation with optional features and door sizes.

Mount these horizontal mailboxes in large banks, or on multiple walls.

Vertical mailboxes have top-loading tall, skinny compartments.

1400 Series - Standard
for Postal Delivery

florencemailboxes.com/horizontal

Door Sizes

Standard horizontal mailboxes are pre-configured with the following door sizes:

Tenant Compartments

6-3/8" 5"
1400
1H x 1W

12-7/8" 5"
1403
1H x 2W

Collection Compartment

12-7/8" 10-3/8"
1404
2H x 2W

Parcel Locker Compartments

12-7/8" 10-3/8"
1404
2H x 2W

12-7/8" 15-3/4"
1406
3H x 2W

As an indoor solution, these traditional-style mailboxes are most popular in apartment complexes, and university/military housing. The standard for decades, these are available as replacement units for worn out installations. (All new construction must use the postal approved STD-4C mailboxes, see page 30 for details.)
Standard Features

- Front-load
- Recess-mounted
- Prepared for USPS installed Master Lock
- Anodized aluminum finish
- 5-pin cylinder tenant cam lock with two keys (1,000 key changes) see page 40
- Snap-on outer trim kit (available by request)
- Clear plastic number slots or engraved numbers

Plastic Number Slot:
Number slots are 5/8"H x 2"W. (Available on tenant compartment doors only.)

Engraving: Custom engraving utilizes the USPS Standard *US Block* font and is 3/4" tall. All engraving can include up to 5 characters in one line per door.

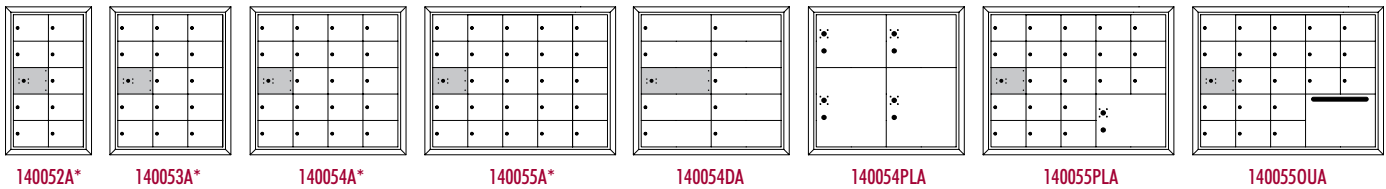

If your installation needs a little more customization than available on the standard 1400 series, select the custom 1400 series to swap doors and lock types. See pages 40 - 41 for details.

Note: Horizontal mailbox installations should be protected from direct exposure to the weather; Florence is not responsible for damage caused by weather conditions as these products are rated for indoor use only.

NOTES:
Standard modules noted with an asterisk (*) are fully configurable; visit florencemailboxes.com/configure to quickly and easily create your custom solution.
See pages 40-41 for compartment size definitions and configurable options.
All model numbers listed are for standard front-load modules; add -SP for custom modules at the end of the number.

1400 Series - Custom
for Postal or Private Delivery

Providing an opportunity for greater flexibility in door size and type selection, the Florence 1400 Custom Series allows you to upgrade your horizontal mailboxes to fit your installation needs. This configurable solution lets you be the designer as you place the doors where you want them instead of being tied to a pre-determined standard module (see door size chart on opposite page for options).

**florencemailboxes.com/configure**

Optional Features

- Private master lock
- Eight powder coat color finishes
- Combination lock (for private services only)
- Configurable door sizes and layout options

Note: Horizontal mailbox installations should be protected from direct exposure to the weather; Florence is not responsible for damage caused by weather conditions as these products are rated for indoor use only.

Lock Selections

Cam-lock is USPS Approved and standard on all horizontal mailboxes. Lock comes with two keys (1,000 key changes). Combination lock option for Private Delivery only.
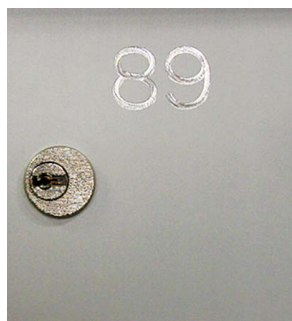

For lock maintenance, only graphite type lubricants are recommended on product locks. For additional assistance with locks, contact your local locksmith.

Configurable Modules

florencemailboxes.com/configure

Sometimes a standard sized compartment is simply not big enough to suit your residents' needs. That's why you can change mail compartment sizes or add as many collection and/or parcel lockers as your installation requires. Simply begin with an all tenant standard module found on page 39, and modify it by placing any of the various door sizes and types found in the chart below.

To quickly design your custom horizontal mailbox installation, Florence has developed an easy-to-use Revit mailbox configurator which is unique to the industry. This do-it-yourself online tool provides the opportunity for you to place the doors not only where you want them, but with as many as you want. So go ahead, add two collection boxes - one for rent, one for mail in your design; it's your mailbox!
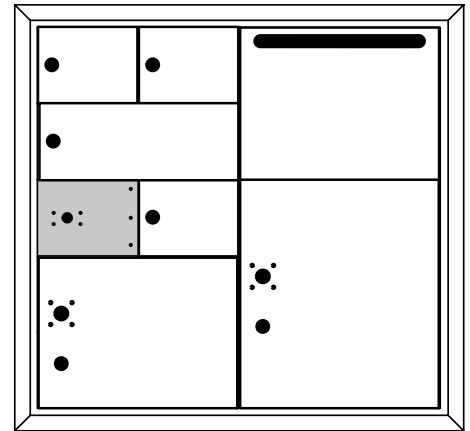

Our configurator tool does the math for you, provides a drawing and even allows you to submit your creation for quote!

Door Sizes

Configurable units available in cabinet sizes 2 - 5 Wide and 5 - 7 High.

|	Tenant Compartments	Collection Compartments	Parcel Locker Compartments
1400 One-High, One-Wide (5" H x 6-3/8" W)		NOTE: Tenant compartment ID options include plastic number slot or engraving.		NOTE: Collection compartments are available with or without an access lock and can be engraved.	
1403 One-High, Two-Wide (5" H x 12-7/8" W)			
1404 Two-High, Two-Wide (10-3/8" H x 12-7/8" W)				NOTE: Parcel locker ID options includes engraving. See page 38 for details.
1406 Three-High, Two-Wide (15-3/4" H x 12-7/8" W)
